Faculty Position

**Systems and Industrial Engineering Department**

**The University of Arizona**

The Department of Systems and Industrial Engineering at the University of Arizona invites applications and nominations for a tenure-track position at all levels (Assistant, Associate, and Full) with an anticipated start date of August 2017. Specific areas of interest include (1) Cyber-Physical System Security, (2) Cyber Resiliency Engineering, (3) Modeling and Optimization of Networked Devices (e.g. Mobile, Healthcare, Transportation, and Smart Grids), and (4) Control Systems Cyber Security. Candidates for senior ranks must have a distinguished record of published research, demonstrate significant impact on the profession, and success at securing funding to support a research program.

The successful candidate will be expected to establish a strong research program, teach undergraduate and graduate courses, and contribute to mentoring students, including those from underrepresented backgrounds. The successful candidate will also be expected to contribute to an environment that nurtures collaboration among associated disciplines in Cybersecurity across the College and University. The successful candidate will also participate in outreach and contribute to departmental, college, and university service. In these, and other ways, the faculty member will help to develop innovative approaches to enhancing student engagement, increasing diversity, and expanding collaborations with community and business partners.

The Department was founded in 1960 as the first degree-granting department of Systems Engineering in the world. The Department now houses three integrated academic programs leading to Accredited BS degrees in Systems Engineering, Industrial Engineering and Engineering Management, as well as MS degrees in Systems Engineering, Industrial Engineering, and Engineering Management, and a PhD degree in Systems and Industrial Engineering. Additionally, the Department participates in the recently launched interdisciplinary MS degree program in Cybersecurity, in partnership with the Eller College of Management and Department of Electrical and Computer Engineering.

The University of Arizona, a Research I institution, ranks 20th among public institutions in annual research expenditures, and is recognized as a Center of Academic Excellence in Cyberdefense Research by the National Security Agency and Department of Homeland Security. The Department of Systems and Industrial Engineering is ranked among the top 25 programs by the US News and World Report, and has strong programs in the fundamentals of systems engineering, operations research and industrial engineering, including decision systems, optimization, stochastic systems, quality and reliability, systems engineering and design, modeling and simulation, informatics, and is involved in several interdisciplinary programs. Additional details can be found on the department web page: [http://www.sie.arizona.edu](http://www.sie.arizona.edu).

Applications must be submitted on-line at [https://uacareers.com](https://uacareers.com) (citing posting #F21168). Candidates should include a curriculum vitae, statement of research and teaching interests, cover letter, and list of references.
At the University of Arizona, we value our inclusive climate because we know that diversity in experiences and perspectives is vital to advancing innovation, critical thinking, solving complex problems, and creating an inclusive academic community. We translate these values into action by seeking individuals who have experience and expertise working with diverse students, colleagues and constituencies. Because we seek a workforce with diverse perspectives and experiences, we encourage minorities, women, veterans, and individuals with disabilities to apply. As an Employer of National Service, we also welcome alumni of AmeriCorps, Peace Corps, and other national service programs.

Applications will be reviewed starting January 9, 2018 and will be accepted until the open positions are filled.

Questions should be directed to Professor Young-Jun Son, Head of the Systems and Industrial Engineering Department at the University of Arizona (son@sie.arizona.edu).
